PHOTO LIBRARY

SLIDE CATALOGUE

This is the current Slide List. It identifies plants that appear on the slides presently held in the collection. In some cases we hold more than one slide of the same plant, e.g. showing the whole plant; a close-up view of a flower or foliage; showing the plant in association with others, and so on.

In addition to the slides of individual plants, the Library has a number of other garden slides; their categories are given below.

Slides continue to be donated to the Library and as this happens the list is revised. An up-to-date list can be downloaded from the website. It can always be had by e-mail (as a pdf file) or by sending me **7 x 2nd-class stamps** to cover the cost of production and postage.

The quality of slides in the collection varies from excellent to fair. When I have a choice I send out the best available slide. The accuracy of the plant naming cannot be guaranteed. Slides can be converted to digital images if required.

Packs of slides will be sent to HPS members on request. To borrow slides, a member should send to me: -

1. A PRINTED list of the names of the plants to feature on the slides (use abbreviations, so long as they are understandable). It is helpful to suggest substitutes or to name the theme of the talk, in case particular slides are out on loan.
2. The DATE on which the slides are to be **shown** - giving at least two weeks' notice. (Slides are sent out by 2nd-Class Post and **should arrive about one week before the date of showing**.)
3. The necessary number of 2nd-class stamps to cover the cost of post and packing:-
Up to 48 slides: 5 x 2nd class stamps.
49 to 72 slides: 6 x 2nd class stamps.
73 to 84 slides: 7 x 2nd class stamps.

The maximum number of slides that may be borrowed on any one occasion is **84**.

Orders and/or queries may also be sent by **e-mail**; in such cases the necessary stamps for payment may be sent when the slides are returned to me. Regrettably, it is not possible for me to reserve slides. Orders are dealt with in order of dates of showing and early ordering does not mean that slides can be "booked".

ALL SLIDES MUST BE RETURNED BY FIRST-CLASS POST THE DAY AFTER THEY HAVE BEEN SHOWN. OTHER MEMBERS MAY BE WAITING TO BORROW THEM.

Users' comments on the slides, when they are returned, are welcomed.

COPYRIGHT

Slides are accepted by the HPS Photo Library on condition that the Hardy Plant Society can lend copies and publish them as and when it sees fit and without payment. The photographer and the HPS Photo Library will be acknowledged

Slides other than specific plant portraits are grouped under these headings:

Botanical	Herbaceous Borders
Container Planting	Monocolour Borders
Cottage Garden	Notable Gardens
Eel Worms in Penstemons	- (<i>not necessarily views of plantings</i>)
Foliage Effects	Plant Groupings
Garden Views	Water Gardens
The Hardy Plant Society	The Winter Garden
(<i>including the HPS Garden at Pershore</i>)	Wildlife in the Garden

There are also ready prepared lectures on the following topics :-

Hardy Perennials for all Seasons.

Hellebores in the Winter Garden.

Snowdrops and Hellebores and their Winter Companions.

Stripes, Splashes and Spots – Is Variegation Attractive.

Perennials, Past, Present and Future.

Hardy Geraniums – Controlling a Passion.

Heucheras and their Relatives.

The Garden in Autumn and Winter.

Plant Arranging in the Garden.

A Garden on Chalk.

Ten of the Best Perennials.

Please note that the mounts of the slides are not of standard thickness and many of the slides will not fit into those magazines designed to take only the thinnest mounts. I find that the thin mounts are most likely to be damaged in the post.

Donations of slides (with plant identified) are always welcome. With only a few exceptions the slides in the Library have been donated by HPS members; if you borrow from the Library you might also be able to give to the Library.
