

Plant Exchange

The scheme will work as follows:

If you are having trouble sourcing a shade plant that you really want you will send an e-mail to wasjsime@gmail.com (whilst not wishing to be prescriptive, normally this will not have more than about 3 listings in the Plant Finder).

The name of the plant will be added to a list of 'Wanted Plants' and published regularly in 'Shade Monthly'.

If you are able to propagate a plant that has been requested, you will send an e-mail to the above address. I will remove the name from the list and then email both supplier and requestor so that they can get in touch to arrange the exchange between them. Often it will take some time for the supplier to propagate the plant once the exchange had been agreed.

There will be no charge for the plant, but if you are particularly pleased with one, you may like to make a small contribution to group funds. An 'honesty box' will be available for this purpose at the group's AGM. The requestor will cover any costs incurred by the propagator in sending the plant to them. It may often be possible to do this without cost if both are attending the S&W group's AGM or similar meetings.

Please bear in mind that these plants will be relatively small compared to those bought from nurseries and may often need TLC before committing them to the garden.

Finally please note that this service is only available to paid-up members of the Shade and Woodland Plant Group.
